Experience

Frontend Developer, Self-employed Freelance Hayward, CA 6/2023 - Current

- Collaborated with clients to discern and translate their business objectives into actionable website enhancements and functionalities.
- Design and build professional websites using **HTML5, CSS3, JavaScript**.
- Managed project timelines and communicated progress and challenges effectively to clients.

Web Developer, Intern Super Purposes Seattle, WA 11/2022 - 01/2023

- Implemented multiple complete web pages on the company site using **HTML5, CSS3, and JavaScript** on **WordPress**.
- Worked closely with UX designers to translate design mockups and wireframes into functional web pages.
- Provided feedback on design prototypes, suggesting potential improvements for better user experience and responsiveness.
- Actively participated in coding reviews, assessing the quality and efficiency of code from fellow developers.
- Collaborated with cross-functional teams, ensuring web development goals aligned with the company's broader objectives.

Team Lead, Caterer Jason LY Staffing San Jose, CA 10/2019 - Jan/2022

- Led the setup of venues, ensuring seating arrangements, table settings, and decor aligned with client specifications and event themes.
- Trained new staff members, sharing best practices and ensuring they are well-equipped to provide top-tier service.
- Assisted in inventory management, ensuring catering supplies were adequately stocked for upcoming events.

Black Box Tester, Intern Adobe San Francisco, CA 10/2016 - 12/2016

- Executed rigorous black box testing for various new products within the mobile app, ensuring functionality and user experience met design specifications.
- Verified the proper functioning of specific features within the app, conducting regression testing after each bug fix to ensure no additional issues arose.
- Identified, documented, and reported bugs, inconsistencies, and areas of improvement, working closely with the development team for timely resolutions.
- Collaborated with the QA team, sharing insights and adapting testing strategies based on collective feedback.

Education

Bachelor of Science San Francisco State University San Francisco, CA 08/2017 - 05/2023

- Computer Science

Projects

- **Basic Calculator** | [Calculator](#) | [GitHub](#)
 - Developed a user-friendly calculator interface leveraging the capabilities of **HTML** and **CSS** to ensure a responsive and intuitive design.
 - Implemented core calculator functionalities using JavaScript, enabling users to perform simple arithmetic operations seamlessly.
 - Utilized GitHub for source code management, ensuring a structured workflow and safe storage of project files.
- **Shoe-Store** | [GitHub](#)
 - Developed a dedicated site showcasing a diverse range of shoes and sizes.
 - Utilized the powerful **React.js** library for front-end development.
 - Crafted an engaging and user-friendly interface for optimal user experience.
- **E-Commerce-Bookstore** | [GitHub](#)
 - Developed a comprehensive online bookstore platform for showcasing a diverse range of books.
 - Leveraged **HTML** for structured content presentation, ensuring ease of navigation for users and **CSS** for styling, creating a visually appealing and responsive layout tailored for a seamless shopping experience.
 - Integrated JavaScript to enable dynamic content display, interactive user elements, and smooth page transitions.
